Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

Re Item III

Rules 39.1(iv) and 67.1(iv) PCT - Method for treatment of the human or animal body by therapy

Re Item V

The following document is referred to in this communication:

D1 : WO 02/092783 A (CHILDREN'S MEDICAL CENTER CORPORATION) 21 November 2002 (2002-11-21)

INDEPENDENT CLAIM 1

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT. Document D1 (paragraph 62, figures 8a, 9) discloses (the references in parentheses applying to this document) all technical features of claim 1:

An apparatus for aspirating, irrigating and/or cleansing wounds, comprising a fluid flow path comprising a conformable dressing having a backing layer (115), at least one inlet (145) and one outlet (150) pipe, a means for fluid cleansing (155), a biodegradable scaffold (105) located under the backing layer, a fluid reservoir (130), a device for moving fluid (160), such that fluid may be supplied to fill the flow path and recirculated.

INDEPENDENT CLAIM 9

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 9 is not new in the sense of Article 33(2) PCT. Document D1

discloses (the references in parentheses applying to this document) all technical features of claim 9:

A conformable dressing for use in an apparatus according to claim 1, comprising a backing layer (115), at least one inlet (145) and one outlet (150) pipe the point at which each inlet and outlet pipe passes through and/or under the wound-facing face forming a relatively fluid-tight seal or closure and a biodegradable scaffold (105).

DEPENDENT CLAIMS 2-8

Dependent claims 2-8 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT). See the documents and passages cited in the search report.

Re Item VI

Certain documents cited

The priority documents pertaining to the present application were not available at the time of establishing this opinion. Hence, it is based on the assumption that all claims enjoy priority rights from the filing date of the priority document. If it later turns out that this is not correct, document WO2004/037334 could become relevant.

Re Item VIII

Clarity issues (Article 6 PCT):

Claim 1 contains several optional features which have no limiting effect on the scope of the claim.

Claim 5 contains a disclaimer ("without the circulating fluid coming into... contact...") which

PCT/GB2004/004567

renders it unclear.

Claims 7 and 8 cannot depend on claim 3 but rather on claims 5 or 6, since no "other fluid" is defined in claim 3.
